

Woodman School Council Presents
Dr. Sarah Eaton (PhD) – The Werklund School of Education – U of C

Artificial Intelligence and Education: A Conversation with Educators and Parents

Monday May 13 at 6pm

In person at Woodman School – 8706 Elbow Drive SW

Online via Microsoft Teams – [join the presentation](#)

Please RSVP to parentcouncilwoodman@gmail.com by May 8.

Teaching, learning, and assessing have become increasingly complex with the emergence of generative artificial intelligence (Gen AI) apps and tools that students can access freely or at a low cost. In this talk, Dr. Eaton provides insights into how Large Language Models (LLMs) such as ChatGPT and similar apps are impacting education. Dr. Eaton will share insights from a recent research project she is leading at the Werklund School of Education (University of Calgary). This session is not about how to use specific tools. Instead, we will delve into the broad ethical and practical implications of AI for education. We'll also talk about how GenAI can help neurodivergent students and those with learning difficulties.
