## Engagement Woodman School, March 2025 Online Survey Comments

Below you will find all comments provided in the survey as they were written. Comments have not been edited for spelling, grammar, sentence structure, truncation or otherwise.

### **Please share any other thoughts you may have about your SDP:**

- As a new family to the school I really appreciate the wellness activities
- Thank you! I agree that this program helps students and their parents actively participate in the school process.
- Not applicable.
- It is responsive to the needs shown by students in the building, rather than generic. Woodman seems to take parent feedback seriously within the planning process (e.g., fewer residencies because these were less well supported by parents). Your efforts are appreciated.

### **Please share any other thoughts you may have about our school budget and fees:**

- The music program is amazing and Woodman is being noticed by the music arts community.
- Our school budget and fees is absolutely sane and reasonable
- I think council and the staff are thoughtful about how to get the most of the limited money we have. There are opportunities that would suit a range of students and their interests, so that hopefully there is something appealing for every student each year. We wish the education budget was more generous, as it is sad that much of these purchases are funded by the casino.

### **If you answered “other” to the question about artists-in-residence, please specify the curricular area or idea:**

- This is not relevant to my child
- I could suggest an artist-in-residence program focused on digital media and design, where students learn about graphic design, animation, or video production. This would integrate art with technology and enhance creative skills relevant to modern careers.
- Musician
- Something science based

# *dialogue* )))

- Indigenous knowledge keeper
- Dance or improv
- Anything related to dance
- Both!
- Dance and movement
- it would be nice to have a legacy project such as a mural where students can all be a part of it, and future students can see it
- scientists, doctors, engineers
